Employment

**Legal solutions acknowledging
your organization and your needs >**

We believe that, when it comes to employment issues, every organization has its specifics that need to be acknowledged and that there is no unique solution.

Thus, we first try to understand the manner and principles on which your organization works before proposing any solution. This way we enable that your internal employment regulation depicts true relations existing or desired within your organization so that everyone is clear with its rights and obligations and that there is no room for misunderstanding.

In Employment Law we provide services from drafting internal acts (Employment Agreements, Rule books, Decisions, etc.) and advise and assist employers in conducting various internal procedures regarding employment issues, as well as in external procedures in front of the competent authorities.

We have represented our clients in negotiation procedures with employees and their representatives in various (non)disputable situations. This way, we acquaint ourselves with the needs of both parties involved and steer our advice towards achieving mutually acceptable solution.

Our experience also covers conducting redundancy and other challenging procedures leading to termination of work relationship. However, if there comes to a dispute, our team is fully capable in assessing its risks and proposing the optimal solution on how to approach and handle it towards the best possible outcome.

Litigation | Debt Collection

Litigation

We advise and represent clients in all stages and in all types of procedures in front of the competent courts in the Republic of Serbia. Our experience spans over civil and commercial litigation procedures, but also misdemeanor, administrative and criminal law procedures.

Our engagement starts with assessing prospects of potential or ongoing dispute and presenting it to our client in order to come to the best possible strategy on how to resolve it.

For every dispute we believe that the best solution is an amicable one, achieved within the shortest possible time and with as little as possible expenses.

On the other hand, as not every dispute can be settled by an understanding of the parties involved, we advise our clients from the very first indication of a potential dispute in order to secure our client's position and prepare for a successful presenting of evidence in our favor. For us, preparation and making the initial strategy for every case is of the utmost importance.

By this approach we secure position of our client, but also ensure that the procedure does not last more than really needed.

Debt Collection

We understand that every company in its daily operations inevitably faces problems with collection of its receivables. Even if those cases are insignificant when compared to the total volume of operations, sometimes hesitation in collection process can be seen as a sign of weakness or even interpreted that failure to fulfill obligations is something that can be tolerated.

On the other hand, as good relations with business partners are of the utmost importance, we understand that matter of debt collection must be handled carefully in order to maintain fair and good reputation on the market.

Thus, we have created and implemented special procedures leading to debt collection, always showing respect for the opposite side, but with the imperative of collecting the debt in the shortest possible time.

Our approach includes accessing the debtor and potential risks in collection procedure, various and precisely timed steps of soft litigation and ultimately and as a last resort collection of debt through enforcement procedure via public enforcement agent.

Through the whole procedure, and regardless of the number of cases in NPL portfolio of the client, we ensure that the client is informed about the status of the collection procedure in each case, potential costs and expected time for the collection of debt, so that proper decisions can be made.
